INTRODUCTION

Our project involves building a user-friendly e-commerce website, designed to provide an enjoyable shopping experience. It includes features like easy product browsing, a functional shopping cart, user accounts for personalized shopping, and an admin panel for efficient product and order management.

Technology Stack

Using React JS for front-end development and Firebase for Authentication and Database management .

Key Objectives

User-Friendly Interface

Intuitive browsing and quick access to products.

Efficient Shopping Process

Functional shopping cart and streamlined checkout.

Personalization through User Accounts

Tailored shopping experience based on user preferences.

Empowerment with Admin Panel

Efficient product and order management

Core Features

User Accounts

Easy registration and profile management.

Product Browsing

Categorized and searchable products.

Shopping Cart

Easy item management and dynamic pricing.

Admin Panel

Product and order management.
